**(54) Title: METHOD TO PROCESS TWO AUDIO INPUT SIGNALS**

**(57) Abstract:** In order to provide a method and a device for the processing of at least two input signals (S1) which contain audio information (Ai) and possibly also video information (Vi) which enable the reproduction of the text information (T2) of at least one further input signal (S2) in addition to the reproduction of an input signal (S1), there is provided a reproduction device (10) for the reproduction of an input signal (S1), and also speech recognition means (11) for determining text information (T2) contained in the audio information (A2) of at least one second input signal (S2), and also an optical reproduction device (12) for the reproduction of the text information (T2) determined. The reproduction devices (10, 12) may be formed, for example, by a common monitor (13).
